

To Whom it May Concern, I am appauled that these bullies from the NAB are trying to shut down XM radio. I am an avid listener of XM radio and regularly use there Instant traffic and weather stations. I like the fact that I can get traffic and weather relevant to exactly where I am instead of having to change channels until I can find a channel that can give me weather in the city 20 miles away from where I am, and then having the signal break up. XM radio is far superior to FM radio. I recommend it to anybody who asks. The fact that the NAB want to try to stop XM radio from having traffic and weather, instead of trying to change there own ways of broadcasting it is appauling and anti american! The whole basis of captialism is competition.
